Las encuestas utilizadas son las siguientes:

- Colombia:* Encuesta Nacional de Hogares (EH-37), siete ciudades principales. Septiembre de 1982. Se seleccionó la ciudad de Bogotá.
- Costa Rica:* Encuesta de Hogares de Costa Rica (nacional). Julio de 1982. Se seleccionó el área metropolitana de San José.
- Panamá:* Encuesta de Hogares, área metropolitana de Panamá. Marzo de 1982. Incluye Colón y Zona del Canal.
- Perú:* Encuesta de niveles de Empleo en Lima Metropolitana. Julio de 1982. Incluye Callao.
- Venezuela:* Encuesta de Hogares (nacional). Primer Semestre de 1982. Se seleccionó el área metropolitana de Caracas.

Los cuadros adjuntos presentan la información desagregada por *estratos* y *grupos de edad* de la población considerada, con excepción de los cuadros 1, 6, 7, 9, 10, 11 y 12 en los que no se consideraron grupos etarios.

Los *estratos* de población fueron contruidos a partir de las distribuciones de ingreso familiar per cápita de los hogares. El *estrato 1* corresponde al 20% de hogares más pobres. En este estrato se incluyeron, además, las empleadas domésticas cualquiera fuese el nivel de ingreso del hogar donde residían. El *estrato 2* está formado por el 30% de hogares con ingresos inferiores al ingreso per cápita familiar mediano. El *estrato 3*, corresponde al 30% de hogares siguientes y el *estrato 4* está constituido por el 20% de hogares de más altos ingresos.

Los *grupos etarios* considerados son: 15 a 24 años; 25 a 34 años; 35 a 44 años y 45 años y más.
